Community Outreach

Over the summer and fall, our department had the privilege of supporting and organizing Tufts MC participation in several community events in Boston’s Chinatown and Quincy.

We provided essential health services to the attendees, such as blood pressure and hearing screenings, as well as important information about COVID vaccines, financial assistance, and myTuftsMed. Thanks to the efforts of volunteers from several departments including Interpreter Services, Volunteer Services, Otolaryngology (ENT Clinic), Dermatology, and Ophthalmology, we were able to provide quality care to over 2000 attendees.

At Chinatown National Night Out, Tufts Medical Center was honored with a community service award presented by Boston’s Mayor Michelle Wu, recognizing our ongoing commitment to the community during the pandemic, from providing care packages and testing, to administering vaccines, providing emergency relief funds, and sharing important health information. We are so proud to be part of and support such a vibrant and diverse community.
