

Louis Weinstein Lectures: 1977-2017

Speaker	Affiliation	Year	Topic of Lecture
Dr. Louis Weinstein	Tufts University	1977	Antimicrobial Therapy: State of the Art
Dr. Baruch Blumberg	Inst. for Cancer Research	1978	Human Cancer and Viruses
Dr. David Baltimore	Mass. Inst. Technology	1980	Viral and Cellular Genes in Viral Carcinogenesis
Dr. Baruj Benacerraf	Harvard Medical School	1981	The Role of MHC Gene Products in Immune Regulation
Dr. Stanley Falkow	Stanford University	1982	Molecular Biology and Infectious Diseases
Dr. Bernard Fields	Harvard Medical School	1983	Molecular Basis of Viral Diseases
Dr. Purnell Choppin	Rockefeller University	1984	The Role of Membrane Proteins in Viral Pathogenesis
Dr. Anthony Fauci	NIAID, NIH	1985	Acquired Immunodeficiency Syndrome: Update
Dr. Anthony Cerami	Rockefeller University	1986	Cytokines and Human Disease
Dr. Michael Sela	Weizmann Institute	1987	Synthetic Antigens: Molecular Drugs and Vaccines
Dr. Elliott Kieff	Harvard Medical School	1988	Molecular Pathogenesis of Epstein-Barr Virus
Dr. John Robbins	NICHD, NIH	1989	Prevention of Typhoid Fever
Dr. Frederick Sparling	Univ N. Carolina	1990	Can We Make a Gonococcal Vaccine?
Dr. David Mirelman	Weizmann Institute	1991	Molecular Basis of Amebiasis
Dr. Elvin A. Kabat	Columbia University	1992	The Basis of Antibody Specificity
Dr. Louis Miller	NIAID, NIH	1993	Malaria: Basic Science and Control
Dr. Barry R. Bloom	Albert Einstein College	1994	The Bacillus is Not Yet all There is to Tuberculosis
Dr. Moselio Schaecter	Tufts University	1995	<i>E. coli</i> and I
John J. Mekalanos, Ph.D.	Harvard	1996	Molecular Analysis of Vibrio Cholerae Virulence
Dr. Jack S. Remington	Stanford	1997	Host Pathogen Interactions in Toxoplasmosis Gondii Infection
Dr. Donald A. Henderson	Johns Hopkins Unit	1998	Bioterrorism
Dr. Harold Varmus	NIH	1999	Using Viral Vectors to Generate Mouse Models for Human Cancer
Dr. John G. Bartlett	The Johns Hopkins Hospital	May 15, 2000	The Academy Awards of Infectious Diseases
Dr. Stanley B. Prusiner	University of California, San Francisco	April 23, 2001	Demented People, Mad Cows, and the Biology of Prions
Dr. Lawrence Corey	Fred Hutchinson Cancer Research Institute, Seattle, WA	May 16, 2002	Developing Vaccines for HIV-1: Scientific and Political Changes

Dr. Sherwood L. Gorbach	Tufts University School of Medicine, Tufts-New England Medical Center	April 24, 2003	A Microbiologist's Intestinal Odyssey
Dr. Julie L. Gerberding	Centers for Disease Control	April 13, 2004	Public Health Impact and Response to SARS
Dr. Martin J. Blaser	New York University School of Medicine	May 5, 2005	What does the extinction of <i>Helicobacter pylori</i> teach us about disease and about human physiology
Dr. Ann M. Arvin	Stanford University School of Medicine Lucile Packard Children's Hospital, Stanford, CA	May 9, 2006	Molecular Aspects of Varicella-zoster Virus Pathogenesis
Dr. Robert C. Moellering, Jr.	Shields Warren-Mallinckrodt Professor of Medical Research, Harvard Medical School Department of Medicine, Beth Israel Deaconess Medical Center - Boston, MA USA	April 23, 2007	Avian Influenza: The Next Pandemic?
NO LECTURE	NO LECTURE	2008	NO LECTURE
Ruslan Medzhitov, PhD	The David W. Wallace Professor of Immunobiology Department of Immunobiology Investigator Howard Hughes Medical Institute Yale University School of Medicine	March 23, 2009	A mechanism of allergen-induced immune responses
David A. Relman, MD	David A. Relman, M.D. Thomas M. and Joan C. Merigan Professor, Department of Medicine – Division of Infectious Diseases, and Department of Microbiology & Immunology Stanford University School of Medicine- Chief, Infectious Diseases - VA Palo Alto Health Care Systems	April 28, 2010	"Stability of the human indigenous microbiota"

Arturo Casadevall, MD, PhD	Professor of Microbiology and Immunology and Medicine Chair, Department of Microbiology and Immunology Albert Einstein College of Medicine Bronx, NY	April 28, 2011	"Thoughts on the Origin of Microbial Virulence"
Bruce Alan Beutler, MD	Professor and Director, Center for the Genetics of Host Defense UT Southwestern Medical Center at Dallas, Dallas, TX Professor and Chairman, Department of Genetics Professor, Department of Immunology and Microbial Sciences The Scripps Research Institute La Jolla, CA	June 14, 2012	"How we sense infections and respond to them: a forward genetic approach"
Charles A. Dinarello, MD	Professor of Medicine and Immunology University of Colorado School of Medicine Division of Infectious Diseases Professor of Experimental Medicine Radboud University, Netherlands	May 14, 2013	"Blocking Interleukin-1 in a Broad Spectrum of Inflammatory Diseases"
James J. Collins, PhD	William F. Warren Distinguished Professor University Professor and Professor of Biomedical Engineering Director, Center of Synthetic Biology, Boston University; Wyss Institute for Biologically Inspired Engineering, Harvard	May 22, 2014	"Radical Approaches to Antibiotics and Antibiotic Resistance"

	University; Investigator, Howard Hughes Medical Institute		
Robert A. Weinstein, MD	C. Anderson Hedberg MD Professor of Internal Medicine, Rush University Medical Center; Chief Academic Officer; and Former Chairman, Department of Medicine, Cook County Health and Hospitals System (formerly Cook County Hospital) Chicago, IL USA	May 1, 2015	"Antibiotic Resistance and the Fecal Patina: Lessons from Goddesses and Sheep"
Richard J. Whitley, MD	Distinguished Professor Loeb Scholar in Pediatrics Professor of Pediatrics, Microbiology, Medicine and Neurosurgery The University of Alabama at Birmingham Division of Infectious Diseases Clinical Virology Birmingham, AL	May 13, 2016	"Herpes Simplex Virus: From Encephalitis to Gene therapy"
Myron S. Cohen, MD	The Yeargan-Bate Professor of Medicine, Microbiology and Epidemiology; Associate Vice Chancellor for Medical Affairs and Global Health; Director, Institute for Global Health and Infectious Diseases and Chief, Division of Infectious Diseases, the University of North Carolina at Chapel Hill	May 19, 2017	"ART Prevents Transmission of HIV: What Happens"
